

**CE 493/593**  
***Design and Operation of Bicycle and Pedestrian Infrastructure***

**Resource and Reading List**  
*Last modified July 6, 2017 by C.Monsere*

### **Key Design-Related References**

We will use the design references both for assigned readings, lecture support material, and as references for homework, labs, and the design projects. Many of them are available free online. The NACTO guides are also available in printed copy for a nominal price (\$50). The “purchase required” references are only available in hard copy and expensive. I have a couple of copies that can be made available to you.

#### ***Available Online***

- FHWA HEP (2016) Small Town Small Town and Rural Multimodal Networks ([link](#))
- MassDOT (2015) Separated Bike Lane Planning & Design Guide. ([link](#))
- FHWA (2015) Separated Bike Lane Planning and Design Guide. ([link](#))
- Caltrans (2015) Class IV Bikeway Guidance, Separated Bikeways / Cycle Tracks, Design Bulletin No. 89 ([link](#)).
- NACTO (2013) Urban Streets Design Guide. ([link](#))
- NACTO (2011) Urban Bikeway Design Guide. ([link](#))
- Oregon DOT (2011) Bicycle and Pedestrian Design Guide (Appendix L), 3<sup>rd</sup> Edition. ([link](#))
- Access Board (2011) Proposed Guidelines for Pedestrian Facilities in the Public Right-of-Way. ([link](#))
- ITE (2010) Design Walkable Urban Thoroughfares: A Context Sensitive Approach ([link](#))
- Manual on Uniform Traffic Control Devices. (2009). Washington, D.C.: Federal Highway Administration ([link](#))

#### ***Purchase Required***

- AASHTO (2012) Guide for the Development of Bicycle Facilities, 4th edition. Washington, DC American Association of State Highway and Transportation Officials
- TRB (2010) Highway Capacity Manual.
- AASHTO (2004). Guide for the Planning, Design, and Operation of Pedestrian Facilities. Washington, D.C. American Association of State Highway and Transportation Officials.
- CROW (2007) Design Manual for Bicycle Traffic, ede Rik de Groot H, editor.

## **Reading List**

The reading list is organized in three categories 1) “Required”, 2) “Optional Journal Articles” and 3) “Additional Resources”. It is expected that **all students will read the required materials** in advance of the lecture that covers the material. The optional journal articles may be of interest to students who wish to advance their knowledge independently. Graduate students should expect to read 1 or 2 additional articles from this list for assignments. The “Additional Resources” list is reports or guides that are likely to be encountered by a professional in the field. These are usually lengthy documents and you are not expected to read the material.

### **1 – Introduction**

#### ***Required***

- **Introduction:** Oregon DOT (2011), Bicycle and Pedestrian Design Guide (Appendix L), 3<sup>rd</sup> Edition.
- **Chapter 2:** Bicycling and Walking in the United States 2014 Benchmarking Report.
- **Chapter 3:** FHWA (2015) Separated Bike Lane Planning and Design Guide.

#### ***Optional Journal Articles***

- Dumbaugh, E. (2005). Safe streets, livable streets. *Journal of the American Planning Association*, 71(3), 283-298.
- Pucher, J. & Buehler, R. (2008). Making cycling irresistible: lessons from the Netherlands, Denmark, and Germany. *Transport Reviews*, 28, 1-56.
- Pucher, J., Garrard, J. & Greaves, S. (2011). Cycling down under: a comparative analysis of bicycling trends and policies in Sydney and Melbourne. *Journal of Transport Geography*, 19, 332-345.

#### ***Additional Resources***

- FHWA (2010). National Bicycling and Walking Study: 15 Year Status Report. Federal Highway Administration, Washington, DC. ([link](#))
- NHTSA (2008). National Survey of Bicyclist and Pedestrian Attitudes and Behavior. ([link](#))

### **2 – Safety**

#### ***Required***

- **Chapter 3:** Bicycling and Walking in the United States 2014 Benchmarking Report.
- Jacobsen, P. L. (2003). Safety in numbers: more walkers and bicyclists, safer walking and bicycling. *Injury Prevention : Journal of the International Society for Child and Adolescent Injury Prevention*, 9, 3, 205-9. [doi:10.1136/ip.9.3.205](https://doi.org/10.1136/ip.9.3.205)

## **8 – Design Characteristics of Pedestrians**

### *Required*

- **Chapter 2:** M. Brewer, B. Ullman; J. Whitacre; E.Park; S. Turner, N. Trout, D. Lord; N. Lalani; K. Fitzpatrick; P. Carlson. (2006) “Improving Pedestrian Safety at Unsignalized Crossings”. National Research Council. NCHRP Report 562 Washington, DC: The National Academies Press. ([link](#))
- **Chapter 9:** Monsere, C., Foster, N., Borkowitz, T., Downey, M. Kothuri, S. Bertini, R.L. “Chapter 9: Pedestrians. *Handbook of Transportation Engineering*”. Taylor and Francis. 2015, pp 119-142 ([D2L-Handbook Chapters](#))
- **Chapter 1: Introduction:** PROWACC (1999) *Accessible Rights-of-Way: A Design Guide*

### *Optional Journal Articles*

- Pecchini, Dario, and Felice Giuliani. 2015. “Street-Crossing Behavior of People with Disabilities.” *Journal of Transportation Engineering* 141 (10) (October 2): 04015022. [doi:10.1061/\(ASCE\)TE.1943-5436.0000782](https://doi.org/10.1061/(ASCE)TE.1943-5436.0000782).
- Gupta, Ankit, and Nitin Pundir. 2015. “Pedestrian Flow Characteristics Studies: A Review.” *Transport Reviews* 35 (4) (March 6): 445–465. [doi:10.1080/01441647.2015.1017866](https://doi.org/10.1080/01441647.2015.1017866).

## **9 – Pedestrian Facility Design and Operation**

### ***Required***

- **Chapter 4, 5 and 6:** Oregon DOT (2011), Bicycle and Pedestrian Design Guide (Appendix L), 3<sup>rd</sup> Edition.
- **Chapters 3:** Fitzpatrick, Kay; Turner, Shawn M; Brewer, Marcus; Carlson, Paul J; Ullman, Brooke; Trout, Nada D; Park, Eun Sug; Whitacre, Jeffrey; Lalani, Nazir; Lord, Dominique. Improving Pedestrian Safety at Unsignalized Crossings. TCRP-NCHRP Report, 2006, 109p ([link](#))
